

Harley Cox - US2002021715

I love our club, and I want to see it continue to grow, adapt, and improve. The Board of Directors have a responsibility to ensure that the organization as a whole continues to successfully operate and hopefully thrive. I have worked at all levels of the organization, and in that role, I feel I will be an asset. I would like to focus on spreading Institutional Knowledge and Succession Planning. I want every member to understand the various club processes, like Approvals, Prestige, VIP points, holding an officer position, and event planning. I want to spread this know-how so we have members up-to-speed and ready to take on officer positions without a steep learning curve when they get into office. I feel that some of our club processes and bureaucracy can be seen as a barrier to entry by new members or new officers, and I think that some technological solutions would help to reduce that barrier. We need new systems to manage prestige, approvals, characters, etc. Most years, our coffers grow about \$20K. I understand we need a safety fund to protect against shortfalls and liabilities, but at the end of 2016 (the last financial report available), we had over \$160K as a club. I intend to advocate for putting those funds to work to pay for the development of professional programs, databases, or apps that will modernize our club and provide a lower barrier to entry, and easier management for casual members. I do not feel like we should wait on others to develop these for us, when we have the means to provide for ourselves.

* I have been a member for the prior 36 months from the end of application period.

* I have not received any disciplinary actions while a member of MES, or a member of the CCP-managed US club

* I have never been convicted of a felony or any other crime related to fraud/theft/embezzlement or anything similar.

* I have never been a voluntary and named party to any action (lawsuit, proceeding, etc.) against CCP and/or White Wolf or subsidiaries or affiliates.

Central Texas College course, Principles of Management

Central Texas College course, Supervision

Univ. of Central OK course, Military Leadership Skills I and II, and Leadership Lab

University of Central Oklahoma - Bachelor's of Funeral Science

Funeral Director / Embalmer since 2010

While attending Central Texas College, the Business Management coursework that I completed placed emphasis on the following elements: planning organization operations, designing and staffing an organization, leading and developing an organization, controlling organizational activities, analyzing situations from a manager's viewpoint, understanding the globalization of management systems, understanding issues and challenges facing managers such as Total Quality Management (TQM), team building, and information systems.

While in the military, as the Operations Training NCO, it was my responsibility to produce training schedules and materials, movement program, and plan day-to-day activity schedules for over 120 soldiers. Communication and organizational skills were a key element in carrying out those responsibilities stateside and during the one year deployment for Operation Iraqi/Enduring Freedom. Earning me the Army Commendation Medal for excelling at those operations and responsibilities. Those same skills were also crucial in finding time and resources for deployed members to recruit new Cam members and hold sanctioned games during deployment for a little R&R. Time management was also crucial in being elected to the office of Regional Coordinator, and performing the RC duties while on deployment.

I have a Degree from the University of Central Oklahoma in Funeral Science. Beyond the scientific studies needed to become an Embalmer, coursework also focuses on the leadership and management skills necessary for a Funeral Director to run a business. As a Funeral Director, I do manage a staff, spend a great deal of time on detail oriented tasks and paperwork,

and I handle situations and help people during emotional, stressful times in their life. I believe these professional skills transfer well and apply to many situations that are encountered as an officer in the Camarilla/MES.
